Education-technology-start-ups Contributing to Economic Development

*Ms. Preeti Agarwal**

We want to create a habit of autonomous learning for Indian students
Byju Raveendran, Founder Byjus

Introduction:

The education start-ups are going to be the reality of near future. Earlier we were talking about the virtual office that would take place of the physical office and that has happened. Now technology is going to take the driving seat to take education to the new spheres.it will drive education in new directions and that is quite possible through start-ups. The whole internet of things (IoT), is quite fascinating .The ideas that break through billions of mind has got platform to be shared .This sharing provides learning, smartness and education. We have been talking much about entrepreneurship and start-ups, after the entry of the present government in the scene. Present government has taken keen interest in the development of the country through start-up, skill India, Digital India plans. If we analyse the three terms we will see interconnection between the three. At one side we are talking about innovation in business, other side about
